

October 20, 2023

Dear Angus Producer,

As sale chairman for the 32nd Annual Kansas Angus Assn. commercial female sale, I would like to extend a special invitation to participate in this year's sale which will be held Saturday, December 2, 2023 at Pratt Livestock, Pratt, Kansas.

The current market prices are exceeding levels not seen for many years. The demand for young, productive, Angus based females will be high due to the significant levels of culling seen in the Southern Plains region over the past several years.

Pratt Livestock will not hold a female sale the Monday before Thanksgiving as in the past; they are joining forces with us to help make this the premier commercial Angus female sale in our area this fall!

We are taking consignments for bred heifers and cows, fall cow/calf pairs, and open heifers. Minimum lot size is 5 head. The females must be predominantly black (black baldies accepted), with no dairy or Brahman influence. Maximum age on cows is 7 years. Bred females must be pregnancy checked within 30 days of the sale by your veterinarian, or by Pratt Livestock vet the day before the sale.

The sales commission has been streamlined to a flat 3% of the gross selling price. This fee gives the best pen spaces with excellent prairie hay and care prior to the sale from the Pratt Livestock crew. Also included is the special sale advertising provided by the Kansas Angus Assn. and Pratt Livestock. A large area of the country will receive the sale listing prior to the sale and we will be contacting past buyers to help merchandise your stock!

Please contact Jeff Mafi (816-344-4266), Jake Lewis (620-770-1069) or Gordon Stucky (620-532-4122) by November 20 to be included in the special sale advertising. A complete online entry form is available at www.kansasangus.org.

Thank you for your use of superior Angus genetics! We look forward to working with you.

Sincerely,

Gordon Stucky

Sale Chairman
